

# Installation Instructions

1. Download all the <productname>Dataxx.sfc files in the folder to a single folder on your machine
2. Download the installer zip for your operating system.  
On Windows this is INSTALLER\_FOR\_WINDOWS<productname>.zip  
On MacOS this is INSTALLER\_FOR\_MACOS<productname>.zip
3. Unzip the installer for your operating system, on window this will give you an exe file, on MacOS this will give you an app file.
3. Run the installer.
4. The installer will ask you if you wish to do an install or deinstall - click INSTALL
5. The installer will ask you to accept the license agreement
6. On windows the installer will ask you where you want the plugins to be installed
7. If the product uses samples, on all operating systems the plugin will ask you where you want the samples installing (unless you are redoing the install for some reason then it will use the location you previously selected)
8. The installer will ask you to point at the folder containing all the <productname>DataXX.cra files from step 1.
9. The installer now has all it needs and will run and install your plugins.
10. The installer will show you its progress in files uncompressed
11. When complete the installer will tell you - press DONE and the installer will close.
